

Looking For The Fastest Way To Process Prepaid And Loyalty Club Customers?

Use SiteWatch® from DRB Systems to scan barcode stickers. Just scan the weather resistant sticker when the customer pulls up to your tunnel.

SITWATCH® MAKES IT EASY TO USE BARCODE STICKERS

Stickers can be installed quickly on windshields, windows or door-jams.

To prevent tampering and abuse, the barcode stickers will self-destruct if they are pulled off.

Stickers can be assigned as club memberships, prepaid cards, or even annual passes.

Complete Prepaid Transactions In Less Time.

Although cards and ticket books are fast, using barcode stickers allows you to maximize the speed advantages of prepaid sales. Your greeters can simply “scan the stickers” rather than wait for the customer to hand over a prepaid card or ticket book.

Call Up Customer Histories Fast.

Barcode stickers also make it easier and faster for your employees to call up customer histories and club plan data. It takes much less time to scan a windshield sticker than it does to enter a license tag number.

Tighter Control.

With barcode stickers, you won't have to worry about customers losing their cards. Since the barcode stickers become “part of the car,” customers can't share them with friends and relatives to get around the rules of your 10th-Wash-Free offers and other loyalty promotions.

A Marketing Tool.

Scanning stickers will reinforce your favorable image with customers and convey the impression that your carwash is a professional facility committed to utilizing the latest

technology. The barcode stickers also act as a miniature “in-car billboard,” constantly reminding the customer about your carwash.

SiteWatch® works with cards, ticket books or barcode stickers to run prepaid sales. The system also lets you use the scannable stickers for unlimited monthly washes, 10th-Wash-Free deals and loyalty club plans. Ask your DRB Systems representative for details.
