

# Can You Afford To Be Down This Saturday?

Get 3-Way Downtime Protection with SiteWatch® from DRB Systems

**1 Dedicated Design –** The hardware and software in SiteWatch has been developed specifically to withstand the demands of operating in a carwash environment. DRB Systems specs all the hardware used in SiteWatch and we write all of the software that makes the system work with consistent reliability.

**2 Extensive Testing –** Before being released, all SiteWatch software is put through a rigorous and systematic series of tests by our in-house team of quality software specialists. This ensures that the SiteWatch System and its peripherals perform up to expectations in the field.

**3 Total Commitment to Support –** DRB Systems maintains a full-time staff of over 45 support professionals at our Ohio headquarters, so we can resolve calls quickly. We offer 24 hour emergency support and answer over 98% of support calls within 7 minutes.

## Proven Performance in the Real World

- SiteWatch works everyday at over 1,300 carwashes
- Over 100,000 SiteWatch FastPass tags have been sold
- An estimated 2 billion cars have been cleaned by our customers
- 34 of the top 50 chains use DRB Systems products
- “My staff has been really happy with the (DRB Systems) support group. They certainly enjoy being able to get somebody over the phone immediately.” Scott Blackstock, Tidal Wave Auto Spa, Georgia
- Learn for yourself what our customers think of our reliability and support by visiting our website to see a complete (and unedited) list of carwashes using SiteWatch

SiteWatch is a powerful computer cash register system for full-service, flex serve and exterior carwashes. The system works with any combination of fixed position terminals, hand held Portable Touchscreen Terminals and the self-pay SiteWatch Xpress Pay Terminal. Among its many features are prepaid card management, FastPass wireless acceptance and the Automatic Recharge Module for monthly passes.

## What's Next?

You can't afford to lose revenue (and customers!) because your computer system fails. Now, more than ever, you need the reliability of SiteWatch and the excellence of DRB Systems' support. If you would like a complete customer list or more information, please contact us at **1-800-336-6338**. Visit our website at [www.drbsystems.com](http://www.drbsystems.com)

*The PC-based TunnelWatch Tunnel Controller from DRB Systems has a simulated pulse and enter switch that will allow you to keep washing cars without losing control, even if your pulse switch or enter switch fails on a busy Saturday.*
