

# DRB Systems®

## StatWatch®

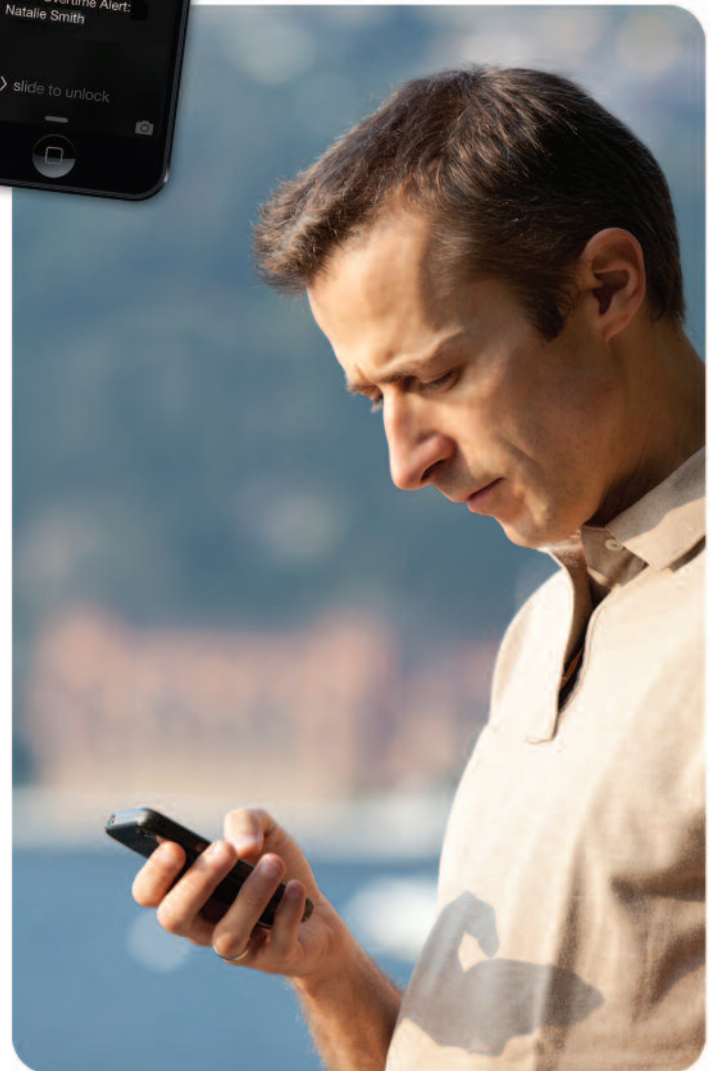

*StatWatch can now push alerts to your phone as employees approach overtime.*

## StatWatch® 2.4

Get a clear view of your business with StatWatch – at no charge to SiteWatch® Support Group Members!

### What StatWatch Will Do for You

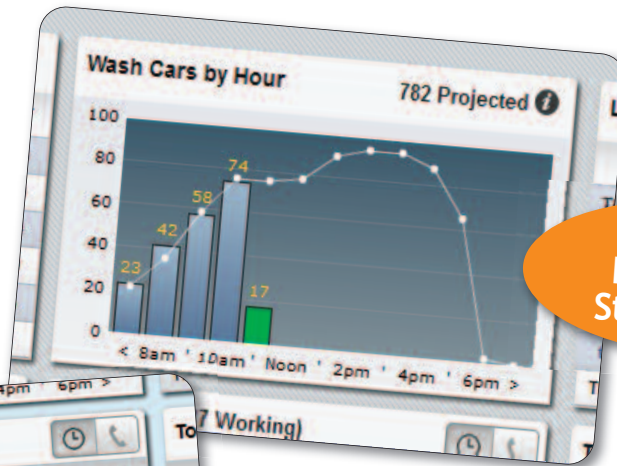

- Sends you push alerts of employees approaching overtime and TunnelWatch® system status messages; both are new features in Version 2.4.
- Adds site group capabilities in Version 2.4 and a newly-designed, interactive comparison feature.
- Delivers constant, secure, and up-to-the-moment updates of key sales and labor stats through your web browser, Android phone or iPhone.
- **Red Zone Alerts** automatically sent to you when key sales and labor metrics deviate too much from normal patterns. These metrics include cars per labor hour, labor per car and labor as a percentage of revenue.
- **Restricted Mobile User** feature allows you to select information that you'd like to hide so it isn't seen by unauthorized users such as managers or shift managers.
- Shows hourly and daily car count, dollars and extra services per vehicle, total extra sales by service type, sales by employee for any profit center and hours for each employee as well as all employees at site.
- Has multiple site reporting when you own more than one location.

## How You Can Use StatWatch to Your Best Advantage

- 1 Sales** - Just one glance at the StatWatch sales screen will give you a good idea of how well your site is generating revenues and profits. StatWatch makes it easy to view hourly and daily car count (by graph and table), dollars per vehicle, extra service sales per vehicle, total extras sales by type of service and sales by employee for any profit center.
- 2 Labor** - StatWatch also makes it fast and simple to see how efficiently your site is operating by providing graphical presentations that show traffic volume per man hour, labor cost per vehicle and labor cost as a percentage of revenue.
- 3 Comparisons** - You can gauge how well a particular site or manager is doing by comparing StatWatch figures for different locations in your chain. StatWatch also shows hour-to-hour, day-to-day and month-to-month comparisons for sales and labor stats. Also see how any week compares to your average week or a week in the prior year.
- 4 Chains** - StatWatch shows sales and labor stats, as well as weather reports individually for each site in a chain in addition to providing site-to-site comparisons. A new multi-site page breaks down all the sites simultaneously and shows totals and comparisons for your entire organization, or group of sites that you define.

	Cars	Extra %	Rate	Util %
This Hour	10	68%	20	23.5%
Last Hour	14	52%	14	16.4%
Today	163	65%	181	19.2%
Yesterday	188	47%	188	20.1%
