

DRB Systems®

Your Customers' Vehicles Come in All Shapes and Sizes... that's Why TunnelWatch® 4.0 Has

Vehicle Profile Detection™

Height Recognition – TunnelWatch now recognizes vehicle heights, so your equipment can adjust to clean different sized cars and trucks more efficiently. For example, bumper spray applicators can be raised for taller vehicles, resulting in better coverage.

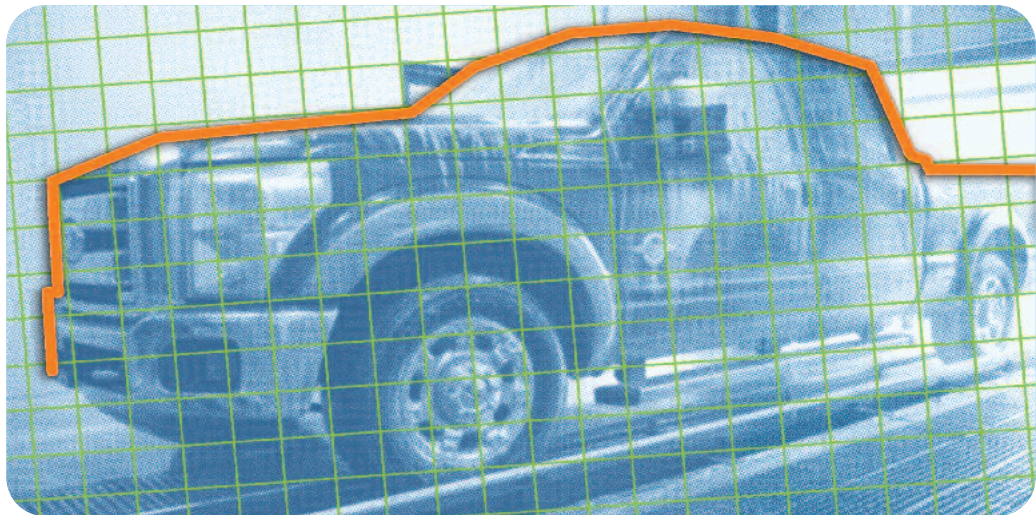

to reduce wear and tear, and stopping chemicals from being sprayed into beds to reduce costs.

Open Pickup Truck Bed Detection – Using sonar to profile vehicles to the inch, TunnelWatch detects features like open pickup truck beds. The controller automatically adjusts for open pickup truck beds, keeping overhead equipment from lowering into the empty bed

More Pickup Trucks = More Savings – The more pickup trucks you clean, the more you'll save with TunnelWatch 4.0. According to *WardsAuto*, pickup trucks now account for 13.5% of all vehicle sales, and their popularity is growing. A *motorintelligence.com* survey found that light truck sales increased 8.8% from November 2013 to 2014. Car sales declined 0.1% over the same period.

TunnelWatch 4.0 with Vehicle Profile Detection will automatically adjust equipment for a pickup truck bed without requiring any action from your employees.
