## Xpress Pay Terminal®

*The self-pay station increases productivity, saves time and allows customers to control their own transactions. Xpress Pay Terminal (XPT®) works for exterior, flex service or full service tunnels – wherever you want the customer to self-pay.*

*Our XPT was designed to put all transactional functions within easy reach of customers so they can complete their purchase with less stress and with more speed.*

### SiteWatch® XPT Helps You Balance Labor with Traffic Volume to Reduce Costs and Increase Profits

- **History Based Profiles** – Target your message based on the amount spent during the customer's last visit. You can also modify your message based on the date of the customer's last visit. If a customer hasn't visited for over three months, your XPT can remind him that his vehicle is probably due for an undercarriage spray.
- **Smartphone Barcode Scanner** – The new smartphone barcode scanner allows you to send coupon barcodes to your customers via email, text or similar electronic methods and have them read at the pay station. The new scanner also reads traditionally printed barcodes.
- **High Volume** – Saves time for your busy customers and increases your productivity by processing up to 80 cars per hour per XPT. Up to eight XPTs can be supported at a single site.
- **Flexibility** – Works as a stand-alone unit at an express exterior or as an express lane at a full service.
- **Xpress Card Clearing®** – Clears credit cards in less than two seconds. If the Internet connection goes down, the XPT will securely store credit card information and transmit it later, so you can continue selling washes without missing a beat!
- **Attractive Audio-Visual Interface** – User friendly, easy-to-follow, and available in English and Spanish. It can be easily customized for your car wash.
- **Weather Resistant Reliability** – Designed for a car wash environment, the XPT stands up to the elements, and it's backed by a 24/7 team of dedicated support professionals.
- **Internal Heater and Solid State Memory Backup** – For added reliability.
- **Shock Sensor & Color Security Camera** – To protect your investment.
- **User-Friendly "Strike Zone"** – Allows your customers to reach all functions to complete transactions without bending or stretching.

## Xpress Pay Terminal®

The smartphone barcode scanner allows you to distribute coupons digitally and have customers redeem them without having to rely on a printer at home.

### A Marketing Marvel

- **Multiple Sites or Single Location** – Replication Logic feature shares information between all XPTs® and home office, allowing loyalty promotions and prepaid sales to be run at multiple sites without sacrificing control.
- **FastPass®** – Process cars ultra-fast with the FastPass Wireless Acceptance System, which uses small (3/4" by 4") windshield tags and radio signals to identify vehicles as they approach the Xpress Pay Terminal. Customers don't even need to roll down their windows! Ideal for prepaids, monthly passes and house accounts.

- **Automatic Recharge Module® (ARM®)** – Identify monthly pass customers as they approach the XPT (using FastPass), and renew their passes by automatically billing their credit cards every month. Customers can update their expired credit card themselves right at the XPT!
- **Prepaid Cards** – Accepts prepaid cards loaded with wash units or cash value. In either case, there is never a transaction fee. Also, the XPT has a built-in gift card dispenser.
- **Prepaid Receipts** – The XPT can load prepaid washes onto receipts.
- **WashCAP** – Customers can buy washes at retail fuel pumps and use them at the XPT, even if the service station is owned by another business.

- **Loyalty Marketing** – The XPT supports club cards. Its screen can have a special menu with different prices for loyalty club members. Receipts can also show members how many washes they need to achieve an award, or the expiration date for their club membership.
- **Intelligent Receipts** – Special sales messages can be printed by the XPT's super-fast built-in receipt printer. These receipts can be aimed at different customers based on past wash options they purchased, the date of their last visit or other factors.

### Valuable Reporting

- **House Accounts** – Issue FastPass tags or barcoded cards to house accounts, and bill them later. You can also sell monthly passes to house accounts that are renewed automatically via credit card billing.
- **Detailed Reports** – The XPT runs on the SiteWatch system, so informative reports can be run for each individual unit at the site and at the hub.
- **Alerts & Bulletins** – Provide real time data about each XPT to any Internet connected device, including cell phones and laptops. This feature can alert you automatically about potential problems.
