

SiteWatch® Outdoor Touchscreen Terminal

Built for the Great (and not so Great) Outdoors

Mother nature isn't always kind. Rain, wind, sleet, snow and other elements can take their toll on outdoor equipment, but the powder-coated aluminum outdoor touchscreen terminal is no fair-weather friend. It's built to stand up to all kinds of environmental conditions, including spray back and moisture from your car wash!

The OTT is a user-friendly, attended touchscreen terminal for tunnel entrances that works with a wide range of SiteWatch products, including the receipt printer, magnetic card reader, barcode scanner, FastPass® reader and SmartCodes® barcode scanner.

- Can be mounted on a wall, counter top or terminal enclosure
- Features 4th generation Corning Gorilla Glass screen for extra damage protection
- Enhanced touchscreen performance with new projected capacitive touch technology
- New Intel J1900 2.4 GHz quad core processor for greater speed
- Rugged but compact. 14.4" (366 mm) width, 11.3" (288 mm) height, 2.8" (72 mm) depth. Designed to VESA MIS-D 100 specifications.
- Aluminum enclosure with powder-coated finish and stainless steel fasteners
- Sealed to IP65 rating for outdoor use. Operating temperature range 14° F to 140° F.
- A 15" TFT LCD with LED backlight, 800 nits (cd/m2), brightness adjustable down to 80 nits, contrast 500:1. This touchscreen is designed for outdoor readability with a very wide range of adjustable brightness settings.

- 128 GB solid-state drive storage
- A total of nine connection ports include power supply, four USB, two RS-232, LAN and VGA. Each port is keyed differently for a trouble-free installation.
- Zinc over alloy receptacles with spring-loaded covers and nylon plugs IP67 rated

Features

- The 15" LED backlit touchscreen is designed for readability in various outdoor conditions with highly adjustable brightness settings. The pure glass touch panel provides superior optical performance with the most scratch-resistant touch technology available.
- The durable, powder-coated aluminum enclosure with stainless fasteners offers the optimal combination of form and function. Ideal for outdoor use.
- Connections are protected with zinc over alloy receptacles, spring loaded covers and nylon plugs. Nine connection ports include power supply, four USB, two RS-232, LAN and VGA. Each port is keyed differently for a trouble-free installation.
- Sturdy, powder-coated aluminum desktop stand is hinged for operator adjustability.

Enclosures

Outdoor/Conveyor Entrance Enclosure

- Designed for an Outdoor Touchscreen Terminal, Keypad Terminal or a Keypad Register at tunnel entrances and presell areas. With room for additional peripherals and power supplies.
- Enclosure hinges at the bottom, allowing the door to swing down out of the way. Made of rugged 14 gauge 316 stainless steel.
- Resists moisture, chemical damage, dust, debris and vandalism.
- Tamper resistant 3-point pad lockable stainless latch.
- Dual 12" aluminum utility mounting plates.
- Includes 36" stainless pedestal.
- Easy to install – conduit run and pedestal mounting instructions included.
- Dimensions: 26" W, 22" H, 20" D

Tunnel Entrance Stainless Equipment Enclosure

- Moisture and chemical resistant. Accessories such as the power supply and printer should not be exposed to chemicals, moisture and extreme temperatures, and should be stored in a separate location.
- Door opens up with welded hinge on top
- Two door stops to prevent damage to the hinge
- Two non-key lockable door handles (keyed locks can be added)
- Enclosure and pedestal is powder coat, painted 304 stainless
- Pedestal is 35" tall with bottom and back wire management
- Dimensions: 30.31" W, 16.31" H, 11.1" D
