

StatWatch®

Get a Clear View of Your Business

Included with a SiteWatch® Rapid Response Annual Support membership, StatWatch allows you to keep an eye on key business statistics wherever you are through your web browser or as a phone app.

Features

- Receive constant, secure and up-to-the moment updates of key sales and labor stats.
- View and compare stats for various locations throughout your chain.
- Manage which employees can access which information with the Restricted Mobile User feature.
- Receive important alerts:
 - Red Zone Alert when key sales and labor metrics deviate too much from the norm
 - Employees approaching overtime
 - TunnelWatch® system status messages

Sales. Just one glance at the StatWatch sales screen will tell you how well your site is generating revenues and profits. View hourly and daily car count (by graph and table), dollars per vehicle, extra service sales per vehicle, total extra sales by type of service and sales by employee for any profit center.

Labor. StatWatch also makes it fast and simple to see how efficiently your site is operating by providing graphical presentations that show traffic volume per man hour, labor cost per vehicle and labor cost as a percentage of revenue.

Comparisons. You can gauge how well a particular site or manager is doing by comparing StatWatch figures for different locations in your chain. StatWatch also shows hour-to-hour, day-to-day and month-to-month comparisons for sales and labor stats. See how any week compares to one in the prior year or average week.

Chains. StatWatch shows sales and labor stats, as well as weather reports individually for each site in a chain in addition to providing site-to-site comparisons. A new multi-site page breaks down all the sites simultaneously and shows totals and comparisons for your entire organization or for group of sites you define.
