

Website Connect™

Extend your Marketing Reach to the Internet

Software Add-on 

Sell washes, prepaid cards, gift cards and monthly passes from your website 24/7.

In today's digital world, your website can be one of your most important sales tools. This SiteWatch® add-on allows you to add an e-commerce component directly to your existing website. All sales made on your website are entered directly into your SiteWatch POS system to provide you with a high level of control. Put your website to work for your car wash with Website Connect.

- **SmartCodes® Support.** Coupons and purchases can be emailed with a QR Code or barcode that can then easily be scanned by terminals at your car wash.
- **Gift Distribution.** It's better to give than to receive, so SiteWatch Website Connect now makes it possible to purchase washes and send them to friends and family as gifts.
- **Multiple forms of payment.** Accepts PayPal payments as well as major credit cards.
- **Monthly Plan Management.** Allows customers to buy or change monthly plans, opt out or change their credit card information.
- **Mobile-Friendly.** Automatically adjusts to mobile screens for a user-friendly experience regardless of the device.
- **Reporting:** You can easily keep tabs on your online sales with robust Website Connect reports available in SiteWatch.
- **Google Tag Manager:** We can add the GTM container to your Website Connect pages so you can easily add tags from third-party marketing tools (Google Analytics, Facebook pixel, etc.) for analytics and online advertising purposes.
