

On-Site Installation and Training

Ensuring a Successful Start

It's often said that "Help is just a phone call away," but when you're trying to open a car wash, that's too far away. You need someone by your side making sure your systems work and to answer any questions you have in those first stressful days in business.

By Your Side From the Beginning

DRB provides customers with on-site installation and training. You can count on our knowledgeable field trainers to make your grand opening smooth and successful. They will make sure your DRB products are implemented to meet your wash's unique needs.

During the on-site installation, you can look forward to these benefits alongside a seasoned Field Trainer:

- Deployment of the DRB products
- Distributor coordination
- Staff training
- Grand opening partnership to handle any 11th hour questions or issues
- DRB University leave-behind binder (exclusive to on-site installs)

Experience You Can Trust

Our installation team knows how to wash cars and is driven by a passion to help car washes succeed. The average tenure of our field trainers is five years. Each field trainer receives several months of training and assists on at least five installs before leading one.
